## Overview

- The 2024 Trust and Confidence Surveys for firearms licence holders and members of the public, were a repeat of the 2022 surveys, as a result of
  recommendation 22b of the of the Royal Commission of inquiry into the terrorist attack on Christchurch masjidain.
- The public and firearms licence holder cohorts received the same survey questions (described below). Minor wording changes were made to the questions of the 2024 survey, to reflect the establishment of Te Tari Pūreke | Firearms Safety Authority.

	40-44	80-84
	45-49	85-89
	50-54	90+
	55-59	

What gender do you identify as? (tick all that apply)

Male

Female

Another gender Please specify: \_\_\_\_\_\_

# Firearms Licence Holder Perspectives - Methodology

- The target population for this survey was current firearms licence holders with a recent system experience of relevance to firearms regulation. Only those with internet access were able to provide their views. The 2024 Trust and Confidence Survey, delivered via SurveyMonkey, required recipients to answer the first question with their allocated code to prevent unauthorised use of the survey, due to the 2022 Baseline Survey being forwarded on by recipients.
- In 2022, the survey was targeted to renewed and new licence holders who had been approved between 1 January and 28 February 2022. In 2024, the survey
  was targeted to firearms licence holders who had interacted with the Te Tari Pūreke Registry Services Team in the 2 months prior to the survey being sent,
  as the Registry did not exist in 2022.
- The inclusion and exclusion criteria were as follows. No efforts were made to identify and exclude respondents from the 2022 survey who also responded to the 2024 survey. Of the 11,341 firearms licence holders that met the criteria below, a random sample of 1,700 was identified, with the final number being 1,699. A total of 503 firearms licence holders responded to the survey, a response rate of 29.6%.

### Inclusions

- Records created between 27/01/2024 and 27/03/2024
- Arms Information System (AIS) domains of Arms Item Declaration, 'Register Arms Items' (both online
  and regulator), 'Transfer' (only the supplier licence is included), 'Change of address or contact details',
  'Change of Health Practitioner details', 'Complete your profile'
- Unresolved calls that have been created between 27/01/2024 and 27/03/2024 where a firearms licence number matches National Intelligence Application (NIA) records
- 'Current' or 'Renewal in Progress' licence statuses
- A-Standard licences

# Exclusions

- Arms Information System status of 'Draft' or 'Cancelled'
- Calls made to the Registry and Services Team where an unresolved call was not logged (as the firearms licence number is not recorded)
- Licence or endorsement applications submitted online as the licence number is entered by the person, and would be at risk of inaccurate entry
- Licence holders who did not have an email address in NIA
- Deceased licence holders

# **Public Perspectives - Methodology**

- The target population for this survey covered members of the public in Aotearoa. Respondents were recruited through the online survey platform SurveyMonkey Audience. Only those with internet access were able to provide their views.
- SurveyMonkey sent email invitations to New Zealand residents between the ages of 18–99 years asking them to participate. No further parameters were
  applied using the Target Audience collector tool, such as location, age, or gender.
- In 2022 Target Audience parameters for location, age and gender were applied (and not fully met for location). For both 2022 and 2024 survey results, a respondent skew weighted toward younger age groups and females was evident, a reflection of who is more likely to volunteer for online surveys.
- On 1 May 2024, the firearms trust and confidence survey was sent to 1,010 members of the public via Survey Monkey. To the extent the SurveyMonkey sampling frame allows, the collection method can be assumed as random.

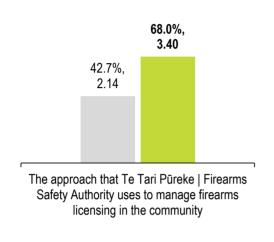

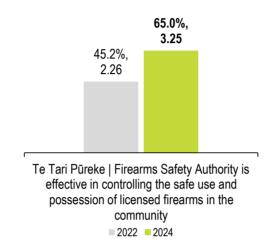

- Firearms licence holder level of trust and confidence **increased** from **42.7**% (2.14 out of 5) in 2022 to **68.0**% (3.40 out of 5) in 2024 for "The approach that Te Tari Pūreke | Firearms Safety Authority uses to manage firearms licensing in the community"
- Firearms licence holder level of trust and confidence **increased** from **45.2%** (2.26 out of 5) in 2022 to **65.0%** (3.25 out of 5) in 2024 for "Te Tari Pūreke | Firearms Safety Authority is effective in controlling the safe use and possession of licensed firearms in the community"
- Firearms licence holder level of trust and confidence increased from 30.4% (1.52 out of 5) in 2022 to 46.9% (2.34 out of 5) in 2024 for "New Zealand Police is
  effective in controlling the possession of firearms held by unlicensed members in the community"
- Firearms licence holder level of knowledge of the Te Tari Pūreke | Firearms Safety Authority approach to firearms licensing in New Zealand decreased for categories relating to "Excellent knowledge" (20.6% in 2022 to 9.8% in 2024) and "Above average knowledge" (48.2% in 2022 to 39.3% in 2024), and increased for the category relating to "Basic knowledge (24.8% in 2022 to 44.5% in 2024)
